VASTU FRIENDLY OFFICE

Vastu principles are useful for each and every short of premises, whether it is residence, showroom, factory, godown or even an office. The basic aim of any office is to get financial growth. Offices which are made according to vastu are helpful in creating a good financial flow. Vastu principles are made keeping in mind various energy fields coming from different directions. These different energy fields affect various spheres of our life. But if we make an office against vastu names we find ourselves standing against natural forces. One of the basic mottoes of vastu is to extract maximum out of natural forces so that we can get maximum energy for each & every field of life. If we are standing against nature some of the energies are obstructed & we find ourselves lacking behind in some spheres of life.

If we talk about the internal part of any office, the account department should be in the north-east or south-east zone and the accountant should face towards east while working. If

the account department also has a public dealing counter, the cashier's cabin should be in the north. The cash box should be kept in the southern wall and its shutter should be open towards north. The best direction for reception is north-east corner and the receptionist should face north or east while sitting. She should sit in such a way that she faces each and every person coming inside the office. The waiting area can be in north-east or north-west.

Marketing and sales department can be made in the north-west corner. Cabins for field staff, peons, drivers etc. can be made in this zone. The best direction for a conference room is north or west direction. The conference table should not be of circular or elliptical shape. It disturbs the magnetic balance of that area and all meetings end without reaching to any decision. The record room can be in the south, west or south-west direction. This is the zone which should have maximum load. The store for waste material can also be made in this zone.

Don't put any table except reception exactly opposite to the main entrance. It can create health problems for your staff. Sitting below a beam or a loft is prohibited as per vastu rules as it increases tension and leads to depression. If any other alternate sitting arrangement is not possible than that loft or beam can be covered with wooden cladding.

Door of cabin should be towards north or east. Person who occupies that cabin should also sit facing east or north. Size of table in any room should not be too big or too small. If it is too big than that person will always feel tired and if it is too small than it reduces his confidence level. Phone, fax machine, photo copiers etc. can be placed in the south-east corner and water glass can be placed in the north-east corner of table. Computer should be kept in the south-east corner of cabin and filing cabinet should be in the south-west corner of that zone. Pamphlets, product brochures, product samples etc. can be kept in the north-west of that cabin. If you like to

have an entertainment room in your office then make it in north-west of your premises. Paint wall of office with light pastel color. Dark colors make us short tempered. Don't put any painting or any sculpture related to meat eating animals, weeping children's, setting sun, drowning ship, still water or any sad event. Picture of Mahabharata is also not allowed in office. All these effects mutual harmony among office members.

Arrangement of drinking water, water cooler, boring, water filter etc. should be done in north-east corner of office. This is the zone of water element. Water is related with finance as per vastu and feng-shui names. So keeping water in this zone increases your financial status. South-east is the direction for pantry in office. Toilet should not be below, above, adjacent or in front of pantry. It spoils the energies of food and eatables and affects the health of the whole office staff. Any staff member should also not sit facing toward toilet. It will be very harmful for him. If

toilet is attached with any cabin then it should not be in north-east of that cabin. Wipe office floor with vastu salt mixed water daily. This removes negative energy and re-strengthens positive energy flow in office. Keep toilet as much clean as possible. Office should also not be near to any hospital, cremation ground or temple. It disturbs the aura of our office totally and leads to low concentration power in office staff.

M.D., Proprietor or Director Room should be in south-west direction. He should face towards north and his back wall should not have any door or window. If back wall is painted with yellow color than it gave wonderful results. Ancestor photograph or painting of any mountain can be hanged on this wall. Door or window can be on north or east wall of his cabin.
